

The Assessment of Functional Living Skills - The AFLS™

Applied Academics (Continued)

TASK	SCORE	TASK NAME	TASK OBJECTIVE	QUESTION	EXAMPLE	CRITERIA	COMMENT
AA 29	0 1 2 3 4 0 1 2 3 4 0 1 2 3 4	Computes average	Learner will compute averages.	Can learner compute an average?	With or without a calculator	4= computes average for number sets of 10 or more numbers that contain values in the hundreds, 3= computes average for number sets of 5 numbers that contain values in the tens, 2= computes average for number sets of 5 single digit numbers, 1= computes the average of 2 single digit numbers	
AA 30	0 1 2 3 4 0 1 2 3 4 0 1 2 3 4	Computes word problems	Learner will compute word problems involving addition, subtraction, multiplication, and division.	Can learner compute word problems?	Addition, subtraction, multiplication, division	4= solves word problems with each of 4 different math operations, 3= solves word problems with each of 3 different math operations, 2= solves simple addition word problems and simple subtraction word problems, 1=solves word problems that involve simple addition	
AA 31	0 1 2 3 4 0 1 2 3 4 0 1 2 3 4	Uses diagrams and charts and graphs data	Learner will demonstrate use and understanding of diagrams, charts, and graphs.	Can learner demonstrate use and understanding of diagrams, charts, and graphs?		4= provides information about content of diagrams, charts, and graphs and draws or creates graphs or charts when given a set of values, 3= provides information about content of diagrams, charts, and graphs, 2= provides information about content of bar (column) graphs and pie charts, 1= requires verbal prompts to provide information about the content of charts and graphs	
AA 32	0 1 2 3 4 0 1 2 3 4 0 1 2 3 4	Uses tables	Learner will read tables and state information represented in tables.	Can learner read tables and state information represented in tables?	Identifies the headings as being "Average monthly rainfall" and "States," finds the average rainfall in California in the month of April, when asked, "Which month does California has the average the greatest amount of rain?" learner replies, "February"	4= explains what tables are, how they present information, and accurately answers questions regarding the information in tables, 3= accurately answers questions regarding the information in a table, 2= finds a specific cell in a table upon request, 1= states the headings on tables
